

Site Visit Reports to Mines and Mineral Processing Facilities

I. EXECUTIVE SUMMARY

The purpose of this report is to present the information collected at 5 site visits to mines and mineral processing facilities conducted by the EPA. Each site visit report includes information about the types of wastes generated, and how such wastes are managed. The following is a list of the site visit reports included in this report:

- o Site visit to Dupont Antioch, Ca. titanium tetrachloride on 7/31/95
- o Site visit to McLaughlin Gold mine, Lowe lake, Ca. on 8/1/95
- o Site visit to Rand gold mine, Randsburg, Ca. on 8/3/95
- o Site visit to Newmont North Operations gold mine, Carlin, Nv. on 5/17/95
- o Site visit to Magma Copper and Cyprus Miami mines, Az, on 3/14/95

Other site reports can be found EPA's technical resource documents, TRD 1-7, already placed on the EPA's Internet system on March 1, 1995.
